SUMMARY

I am a Computer Engineer with experience in Unity Engine and C#, specializing in gameplay programming. I have honed my skills through certifications in game development and programming. While I may not have industry experience yet, I am eager to apply my knowledge, contribute to a team, and continuously improve as a gameplay programmer.

PROJECTS

Karsus RPG - Turn-Based Strategy Game

- Implemented A-star pathfinding algorithm for the navigation of the enemies and player's units.
- Designed and integrated a multi-floor level grid to enhance gameplay depth and reduce linearity.

Dark Age Defense - Tower Defense

- Implemented the object pool pattern for projectile shooting to optimize performance by reducing excessive instantiations
- It utilizes Breadth First Search to get the enemy to point A to point B.

Ultimate Panzer - Action Multiplayer

- Its multiplayer feature is developed using Unity's framework Netcode For GameObjects.
- Integrated the Unity gaming services with their authentication package and used unity relay to connect the game to the internet.

Kitchen Chaos - Cooking simulator

- It's similar to Overcooked, with fast-paced gameplay that requires teamwork, coordination, and quick decision-making.
- Implemented a key rebinding feature, allowing players to customize their keyboard controls for a more personalized gameplay experience.

CERTIFICATIONS

•	C# Programming for Unity Game Development, Coursera	July 2024
•	Game Design and Development with Unity 2020, Coursera	November 2024
•	Complete C# Unity Game Developer 3D, Udemy	November 2024

• Complete C# Unity Game Developer 3D, Udemy

• CS50x: CS50's Introduction to Computer Science, edX December 2024

WORK EXPERIENCE

IT On-Site Support Intern KMC Solutions December 2023 - February 2024

- Registering new clients' biometric IDs using a fingerprint device to grant access to KMC's office.
- Responsible for monitoring and maintaining servers across all five floors, ensuring system stability, and updating the data sheet accordingly.

LANGUAGES, TECHNOLOGIES AND SKILLS

- C#, Unity, Level Designing
- Python, Git, C

EDUCATION

Angeles, Pampanga **Holy Angel University** July 2020 - May 2024

• Bachelor of Science in Computer Engineering, GWA: 1.55
